

PROTEIN

EGGS ARE AN *All-Natural*, HIGH-QUALITY PROTEIN POWERHOUSE

With 6 grams of high-quality protein per large egg and all nine essential amino acids, eggs are an MVP (Most Valuable Protein*).

Protein is an important part of an overall healthy diet. This macronutrient helps build and maintain muscle tissue in adults. Diets higher in protein have also been shown to help people feel full and satisfied after eating, helping to control their appetite and support a healthy body weight.

Spread the Word

NOTHING SAYS LUNCH LIKE A PROTEIN-PACKED SANDWICH!

This egg sandwich is ready in just 15 minutes and contains 21 grams of protein. Mix things up at lunch with this not-so-classic recipe: EggNutritionCenter.org/EggSandwich

EATING ON-THE-GO?

Roll your salad into a wrap and power through the day. 38 grams of protein in this recipe! EggNutritionCenter.org/OnTheGo

IS YOUR PROTEIN A MVP?

Learn the benefits of high-quality protein: EggNutritionCenter.org/ProteinMVP

KEY MESSAGES

- Eggs contain high-quality protein with all of the essential amino acids.
- Research shows that eating meals with 20-40 grams of protein, such as egg protein, helps promote muscle protein synthesis.
- Nearly half of the egg's protein is in the yolk. So eat the whole egg for all the protein.

*Egg proteins, like milk and beef proteins, are readily digestible and contain all the essential amino acids.
